

Parrot Car Kit - MKi Button Synchronisation

The remote control button of an MKi range Parrot car kit can be synchronised or programmed in by a combination of button presses. Wait for the bluetooth kit to become active then follow the instructions.

Synchronising A Parrot MKi Button to the Car Kit	
1. Turn on the car ignition and wait for device to start up,	
2. When 9200 or 9100 is displayed on the screen then,	
3. Hold down the green button and the play/pause button together with one hand,	
4. Press the red button several times with the other hand.
